

Liaison Officer Report 26/3/25

DVLA

Well, a rather disappointing start to my Tenure if I'm completely honest, after taking Months to get everything in place to take over (Unnecessarily) I have had to turn away 2 members requests to date their Vehicles as the information required is simply not available. This sadly shines a light on what a missed opportunity we have with our own registers.

On top of that in the last week I have had 2 members contact me chasing dating certificates that I thought Matt had already dealt with!

Oh well, Never Mind, Onwards and Upwards!!

FBHVC

[FOCAS The Federations new On-Line Club Archive System, something we should certainly look to investigate further.](#)

I have forwarded everyone the Brochure on this separately

Finally, The Federations "National Historic Vehicle Survey 2025"

James has submitted our official response as a club. However, can I just take this opportunity to remind the rest of the committee that this survey is aimed at **ALL** club members and for that matter all owners of classic vehicles. The more responses they get the greater the clout when negotiating/lobbying on our behalf.

Think that's all for Now.
